Face Control head, eyes, eyebrows, nose, and mouth with a webcam. This behavior is available by default. Home screen Use Characterizer to easily create a custom puppet based on your facial expressions and reference art. Breath Simulate breathing in your puppet. You can build your characters and bring them to life using Character Animator. Try moving and rotating your head from side to side, making different facial features, blinking, and talking. Body Control your puppet's arms, torso, and legs using your webcam. Fader Fade a layer on and off via trigger. Handle Fixer Prevent movement in a puppet's mesh. This behavior is available by default. Watch this video for a quick introduction to the various Behaviors you can apply to your puppet. Some behaviors use external controls, such as the webcam or audio or mouse input. Fore more information, see Create a puppet using Puppet Maker. You do so by first capturing your performance using a camera, microphone, keyboard, mouse, or touch screen. Transform Translate, scale, and rotate handles of a puppet and adjust opacity. This behavior is available by default. We hope to make this process easy for everyone in the future.If you are an experienced Character Animator user and are interested in making your own Puppet Maker template files, please fill out this Google Form. Characterizer on the Ch Home screen Customize an animated character and get a unique puppet to use in your own creations. For video tutorials, see Adobe Character Animator tutorials. Auto Blink Simulate eyelid blinking or layer flickering. Walk cycle Export the recorded scene or integrate with other Adobe applications After you have recorded the scene, using Dynamic Link, you can open a scene directly in After Effects or Premiere Pro and keep a live connection to the original scene in Character Animator. For more information, see Control puppets using behaviors. Click Open Characterizer in the Home screen to get started. Okay Saurai is a YouTube channel with a collection of tutorials. How do I use the application? You can choose to use a template puppet, create a new character using Characterizer, Customize an animated character using Puppet Maker, or create your own puppet. Watch this tutorial for more information. Allow objects to be affected by physical forces, like gravity and wind. This behavior is available by default. Head & Body Turner Switch between groups as you turn your head and body. Particles Continually emit objects with velocity and affected by physics such as snowfall or a cannon. For more information, see Export. While you are performing, Character Animator captures your facial expressions and body movements. Nutcracker Jaw Control the lower jaw of your puppet with your face or voice. To see the basic system requirements to run the application, see System requirements | Character Animator. Motion Trigger Switch between layers based on the directional movement of the group's parent mesh. We will begin reaching out to small groups in the coming months as we continue to work on this feature. This behavior is available by default. To open the artwork automatically in Photoshop/Illustrator, use the Edit Original command on the puppet, or hold down Command (macOS) / Ctrl (Windows) while clicking the example puppet. Click here to visit the channel. You can also create a puppet with your own art by importing a multi-layered Photoshop or Illustrator file. Create your Character Animator project A Character Animator project is a collection of puppets, scenes, and supporting items (for example, artwork and audio files). You can choose to use the templates available from the Character Animator Home screen. For more information, see Bring your 2D characters to life. Note that it is very important that the puppet is made according to the standards required for rigging it. Puppet Maker lets you select a style, pick features like skin color and clothing, and generate a final optimized puppet. Read on to see the Behaviors that you can apply to control your puppet and bring them to life. Most behaviors have parameters that let you customize the results. Wiggler Make vector artwork wiggle. Summary of what this application is, how to download and install it, and getting started using Character Animator to animate your puppets. For more information about the latest release, see What's new in Adobe Character Animator. Each project is stored on disk as a separate folder. Eye Gaze Control eye pupil movement separate from the rest of the face. This behavior is available by default. Create your first character There are different ways in which you can create your first character. You can install Adobe Character Animator as a part of the Adobe Creative Cloud all apps plan. Character Animator is for anyone who wants to create a character and make it come alive! It helps you to rig a character, create puppets by modifying built-in character templates, by importing your Photoshop and Illustrator characters, or by using new Sensei-powered Characterizer. The exported movie file can be played back immediately. Face tracking is an example of a behavior, and so is walk. Physics Dangle an object to make it sway, or allow objects to collide with each other. The selected file is imported and a puppet appears in the Rig panel. The structure in the Photoshop or Illustrator document determines the structure of the puppet. Behaviors allow you to add expressive control to your puppets. Choose a template puppet from the Home screen, and start animating it. Find answers to your questions in the Character Animator forum. Lip Sync Control a puppet's mouth with your voice. This behavior is available by default. For resources like blank templates, audio files, backgrounds, and PSD and AI mouths that you can use in your own puppets, click here. Here they are categorized by their function or the way they can control a puppet's layer structure or appearance. Character Animator is for everyone from the aspiring to professional animator, video content creator, educators, gamers, graphic designers, or illustrators who work in the media and entertainment industry and require fast-turn animation as a part of their overall workflow. Dragger Control a region of a puppet by dragging with the mouse or by touch. Character Animator enables expressive, high-quality performance-based animation. Adjust the behavior of your puppet A puppet has behaviors, capabilities that let you control its movement, deformation, appearance, and other attributes. For more information, see Recording and playback. It's so fast, it can even be used live. Character Animator allows you to import artwork from Adobe Photoshop or Adobe Illustrator, and breathe life into them. For more information, see Projects. Who is Character Animator for? For more information, see Create puppet using Characterizer. You can export directly to Adobe Media Encoder, or to a PNG sequence and WAV file. For example, you can track your arms, torso, and legs automatically. You can create separate projects to organize related work, such as for an episode of a cartoon or for a specific client. You can also broadcast a scene live to external devices or applications. Changes to the scene in Character Animator are automatically reflected when switching back to After Effects or Premiere Pro. Magnets Make different parts of a puppet or different puppets to connect to each other as they get close. Motion Lines Draw lines behind a fast-moving object to accentuate its movement. For more information about streaming and setting up your system for streaming, see that Stream a scene live. Character Animator can import multi-layered Photoshop and Illustrator files representing the structural pieces (head, eyes, mouth shapes, and so forth) of a character. The authoring experience is currently quite complicated, and is only recommended for expert Character Animator puppet creators in its current iteration. Enable the Camera input and Body tracker Input, then click Calibrate. For more details, see Creative Cloud Plans & Pricing. Use your mouse to drag near the character's arms. Powered by Adobe Sensei, Body Tracker automatically detects human body movement using a web cam and applies it to your character in real time to create animation. We are currently working with a small select group of partners to help bring a diverse set of styles to Puppet Maker. This tool also allows you to host live interaction between characters and fans. How do I download Character Animator? Find a bunch of downloadable example puppets here.
